

Vancouver, British Columbia--(Newsfile Corp. - November 21, 2019) - **Japan Gold Corp.** (TSXV: JG) (OTCQB: JGLDF) (the "Company") is pleased to announce the granting of Prospecting Rights over the historic Aibetsu Goldfield in the Kitami Region of northern Hokkaido by the Japanese Ministry of Economy, Trade and Industry ("METI").

Nine of the 22 prospecting rights applications at the Aibetsu Project, comprising 2,916 hectares, have been converted to Prospecting Rights. This paves the way for drill target definition over high-priority targets in the 2020 field season [See Figure 1].

Prospecting Rights have now been granted over the historic Aibetsu Goldfield which includes three known hard rock and eluvial gold and mercury workings; *Tokusei* (Au), *Motoyama* (Hg) and *Yamamezawa* (Hg), [Figure 2]. The largest of these was the Tokusei gold mine, which was reported to have produced 38,000 ounces of gold and 474,000 ounces of silver from underground development between 1930 and 1943<sup>1</sup>.

Historic production at Tokusei came from a series of approximately 20 banded-epithermal veins hosted in andesitic volcanic rocks. Individual veins varied in length from 22 to 425 metres, with one exceptional vein, the *Sanjinhi* vein, averaging 6.4 metres in width over a 140 metre strike length which averaged 17.7 g/t gold and 20.4 g/t silver<sup>2</sup>.

Government funded work included a drilled vein intercept of 0.95 metres grading 69 g/t gold and 263 g/t silver from a drill hole 500 metres to the northeast of the Tokusei mine workings<sup>3</sup>. The Company has identified extensive areas of anomalous gold and pathfinder elements in soil sampling which highlights the prospectivity of the Tokusei mine extensions. The Company will investigate these anomalies in more detail and will prepare a drilling plan in the 2020 field season. For more detailed information on the Aibetsu Project, refer to the Company's website and news release dated February 28, 2018; <https://japangold.com/index.php/news/2018/204-japan-gold-reports-encouraging-results-from-the-2017-exploration-program-at-the-aibetsu-project-in-north-hokkaido>.

### **About Japan Gold Corp.**

Japan Gold Corp. is a Canadian mineral exploration company focused solely on gold exploration across the three largest islands of Japan: Hokkaido, Honshu and Kyushu. The Company holds a portfolio of 24 Gold Projects which cover areas with known gold occurrences, a history of mining and are prospective for high-grade epithermal gold mineralization. Japan Gold's leadership team represent decades of resource industry and business experience, and the Company has recruited geologists and technical advisors with experience exploring and operating in Japan. More information is available at [www.japangold.com](http://www.japangold.com) or by email at [info@japangold.com](mailto:info@japangold.com).
